

# Instructions GUIDE

## Supplies:

Tissue paper squares (5 sheets per camper)

Pipe cleaner (1 per camper)

Sample pictures (2 per bin)

1. Have campers make a stack of 5 pieces of tissue paper.
2. Fold the tissue paper like an accordion and wrap a pipe cleaner around it to serve as the stem.
3. Gently separate each layer on one side, pulling upward toward the middle of the flower.
4. Do the second side.

Let campers be creative with their flowers. They can alternate colors of tissue paper, so that the center of the flower is a different color, or cut the ends of the tissue during step number two, creating different types of flowers (see below).
